Skills Practice Lab Finding an Epicenter An earthquake releases energy that travels through Earth in all directions. This energy is in the form of waves. Two kinds of seismic waves are P waves and S waves. P waves travel faster than S waves and are the first to be recorded at a seismograph station. The S waves arrive after the P waves. The time difference between the arrival of the P waves ...

Earthquakes are vibrations of Earth caused by large releases of energy that accompany volcanic eruptions, explosions, and movements of Earth's crust along fault lines. The earthquake vibrations are waves of energy that radiate through Earth away from the focus. These waves of energy can be recorded on a seismograph, which produces a recording called a seismogram. Seismographs record the two ...
