Equilibrium describes the state of a reversible reaction, in which the forward and backward reactions happen at equal rates. In this state, the concentrations of reactants and products are stable and do not change over time. Thus, there are no net changes in the concentrations of the reactant(s) and product(s). Such a state is known as dynamic equilibrium. It is a particular example of a ...

Penny Ante was the ultimate low stakes poker from times when a penny still had buying power. It is not a game of its own, but a set stake in any gambling game of poker, where each player "antes up" one cent, and can raise the bet in penny increments as the hand is dealt. Playing a game of penny ante is easy, with just a few modifications to base card games.
